ULTRA-HIGH PERFORMANCE INERTIAL MEASUREMENT UNIT (IMU)

STIM300

- Small size, low weight and low cost
- ITAR free
- Insensitive to magnetic fields
- 0.3 °/h gyro bias instability
- 0.15 °/√h angular random walk
- ±400 °/s angular rate input range
- 10 °/h gyro bias error over temperature gradients
- 0.05 mg accelerometer bias instability
- ±10 g acceleration input range (optional ranges available)
- 3 inclinometers for accurate levelling
- Auxiliary input

STIM300 is a high performance and rugged Inertial Measurement Unit (IMU) comprised of 3 highly accurate MEMS gyros, 3 high stability accelerometers and 3 inclinometers. The IMU is factory calibrated and compensated for temperature effects over the full temperature operating range.

The STIM300 is based upon Sensonor’s proven gyro sensor technology in production for more than a decade, and its high precision Gyro Modules are already designed into many applications worldwide. Another advantage of the Sensonor MEMS technology is the very low vibration and shock sensitivity in any direction.

Range and features
STIM300 full-scale angular rate input range is ±400 °/s and the output is capped at ±480 °/s. Standard acceleration input range is ±10 g. Axis misalignment of as little as 1 mrad is achieved by electronic axis alignment. STIM300 requires a single 5 Vdc power supply and has a digital serial RS422 interface.

STIM300 offers several user selectable output formats and sample rates for gyro and accelerometer data:
- Angular Rate
- Incremental Angle
- Average Angular Rate
- Integrated Angle
- Acceleration
- Incremental Velocity
- Average Acceleration

Device configurations and self-diagnostics
A reliable RISC ARM microcontroller enables easy device configuration and programming. The user selectable Service Mode allows for setting the output unit format, sample frequency, LP filter cut-off frequency, RS422 transmission bit rate and line termination. Service Mode also enables single measurements on demand, and to access detailed diagnostics information.

Evaluation tools
STIM300 evaluation tools supporting PCI or USB connectivity are available. The evaluation tools offer easy access to measurement data and configuration of the IMU. It supports data sampling at alternative rates, graphical presentation, and data logging to file. The evaluation tools contain a RS422 interface for USB or PCI hardware setup, all necessary cabling, and PC software.

Application areas
The STIM300 IMU is well suited for stabilization, guidance and navigation applications in Industrial, Aerospace and Defense markets. It is a crucial building block for inertial navigation systems in UAVs, AUVs, AGVs, UGVs and ROVs, robotics, and more, and offers the designer an ITAR free alternative. In many applications, STIM300 can competitively replace IMU’s based on Fiber Optic Gyros (FOGs) and improve system performance with respect to robustness, reliability, size, weight, power and cost.
**Parameter** | **Min** | **Nom** | **Max** | **Unit**
--- | --- | --- | --- | ---
**GENERAL** |  |  |  |  
Weight | 55 | 85 |  | g
Operating temperature | -40 | 85 | °C
Supply voltage | 4.5 | 5.0 | 5.5 | V
Power consumption | 1.5 | 2 |  | W
Start-up time | 3 |  |  | s
Sample rate | 2000 |  |  | SPS
Mechanical shock, any direction | 1500 |  |  | g
RS422 transmission bit rate | 5.18 |  |  | Mbits/s
Misalignment | 1 |  |  | mm

**GYRO**

Input range | ±400 1) |  |  | °/s
Non-linearity (condition: ±200 °/s) | 15 |  |  | ppm
Resolution | 0.22 |  |  | °/h
Bias instability | 0.3 |  |  | °/h
Angular random walk | 0.15 |  |  | °/vh
Bias error over temperature gradients | ±10 2) |  |  | °/h rms
Linear acceleration effect
Bias | 1 4) |  |  | °/h/g
Scale factor | 50 4) |  |  | ppm/g
Scale factor accuracy | ±500 |  |  | ppm

**ACCELEROMETER**

Input range | ±10 2) |  |  | g
Resolution | 1.9 |  |  | µg
Bias instability | 0.05 |  |  | mg
Velocity random walk | 0.07 |  |  | m/s/√h
Bias error over temperature gradients | ±2 2) |  |  | mg rms
Scale factor accuracy | ±300 |  |  | ppm

**INCLINOMETER**

Input range | ±1.7 |  |  | g
Resolution | 0.2 |  |  | µg
Scale factor accuracy | ±500 |  |  | ppm

1) Optional ranges are available
2) Condition: ΔT ≤ 1°C/min
3) Optional ranges: ±5 g, ±30 g, ±80 g
4) With g compensation
