

***6kW Microwave Plasma CVD System
SDS6K
Flagship Diamond Deposition System for
Large Scale Diamond Production***

SDS6K is an advanced deposition system for mass production of high-quality CVD single and poly crystalline diamond for a wide range of applications and is designed to run long duration production processes with high reliability and high-repeatability. The chamber features a clamshell lid allowing easy access for chamber cleaning and placement of substrates for quick production turn-around

Features

- Water cooled metal chamber and stage with automated Z-axis (optional)
- Extremely stable plasma over low to high power density processes
- Multi view ports for in-situ monitoring and diagnostics
- User-friendly GUI
- Computer controlled recipe-driven and manual mode operation with data logging

Applications

- Gems (Lab-grown diamond)
- Optical components
- Cutting tools
- Heat spreaders
- Electrochemical electrodes
- Power devices and electronic components
- Electron emission devices
- Sensors, MEMS, etc.

4-inch substrate

Main Specifications

● System

Microwave Power	6kW (2.45GHz)
Reactor Chamber Material	Aluminum
Stage Type	Water-cooled
Standard Substrate Holder	50mm (2inch) ϕ
Standard Gas Channel (up to 6 channels)	3 channels (H ₂ /CH ₄ /O ₂)
Operating Pressure Range	10-220Torr
Vacuum Leak Integrity (by He leak detector)	<1 x 10 ⁻⁹ Torr l/sec
Vacuum Pump Type (standard)	Rotary Vacuum Pump (27.5/33.0 m ³ /h (50/60Hz))
System Dimension (approx.)	Reactor Chamber: 900mm (W) x 860mm (D) x 1420mm(H) Control Rack: 570mm(W) x 850mm (D) x 1800mm (H)
System Weight (approx.)	Reactor Chamber: 300kg Control Rack: 400kg

Available Options

- MFC Kit (up to 6 channels)
- Auto Temperature Control Software
- Optical Emission Spectrometer
- Dual wavelength IR pyrometer (475-1475°C)
- Disappearing Filament Optical Pyrometer (850-1750°C)
- Z-axis Automated Moving Stage with Micrometric Resolution
- Dry Pump

The World's Premier Provider of Diamond Synthesis Solutions
